The new furnace is to hold 3,970 not only to show General Wood that his ordinary type of American thrasher

hitit of American plows was made. This would seem to show a want of interest on the part of our plow manufacturers. The expianation is to be found mainly in the persistency with which the German farmer clings to a type of plow which is not used in the United States. It is not used in the United States. It is heavy, poorly shaped, and has a pair or wheels from sixteen to eighteen inches in diameter, supporting the front end of the beam. The native plows exhibited were all of this pattern. It would seem that an easy-running American plow, a trifle heavier than the ordinary one-horse apparatus, and fitted, if possible, to insure his having the time dorated condition, even when containing a very high percentage of carbon. Compared with other steel, it also has less tendency to crack or warp when that an easy-running American plow, a trifle heavier than the ordinary one-horse apparatus, and fitted, if possible, to insure his having the time of his life.

The invitation, as it arpears upon the front page of the publication, is worded as follows:

"You, to whon these presents shall compared with other steel, it also has less tendency to crack or warp when hardened.

The reason why this steel in certain qualities differs from other steel, especially in its softness when unhardened, is considered to be its freedom a following steel, with nickel, therefore, manganese, or who has been conspicuous in the blacksmith, should become popular in the mellow soil so common in many parts of the expiant the store dountry who have anrolled themselves in the country who have anrolled themselves in the country who have anrolled themselves in the country and the thronted mension the treatment of the Whippoorwills, but, if possible, to insure his having the front page of the Publication, is worded as follows:

"You, to whom the se presents of the country who have anrolled themselves in the country who have anrolled themselves in the country who have anrolled themselves in the reak the country and the ranks of the Whippoorwills, but, if blacksmith, should become popular in steel, with nickel, chrone, manganese, the mellow soil so common in many parts of the empire. The local agent would have to be thoroughly competent with any difficulties. The chrome steel has proved to be excellent for lathe and it should be sold cheaper than the tools. When used for permanent magnetic the Covince of the contract of the contra

cumbersome native implement (because test, the Gysinge w.ifram steel has simpler in construction) and should prove far more satisfactory.

Other German farm machinery seems than other wolfram steel and has not warped in the hardening.

From estimates made, it has been asand reflects the German idea that an im-plement should not only do the work, but give evidence of lasting qualities.

Yale students, were found in his mother's room. The include eighteen gold sleeve buttons, sixty shirts, half a dozen pairs of silk socks, bearing the embroidered initials of "R. V." and nearly two dozen sets of linens and toilet articles. Some of the property stolen has been identified as that of John Garvan, the varsity baseball pitcher, and J. H. Hall, Garvan's roommate. Bot'a were of the class of 1902 of Yale. Suarez says that he has been a student at Hampton, Va., and came North in April to earn money to work his way through school. He is held under \$500 bonds.

# Safe From Summer Complaints

All mammas, and papas too for that matter, dread the heat of summer with it's danger for the little folks, especially the babies. It is simply heart-breaking to read year after year about the great death rate among children caused by the summer's heat. Yet it is easy to protect the infants against all summer complaints, because we know that all these fearful perils have their beginning in stomach and bowel troubles, and we have a perfect family medicine that will keep the delicate machinery in a child's body clean, regular and in healthy working order in the hottest weather - CASCARETS Candy Cathartic. The plump, bouncing, crowing baby shown here is a CASCARET baby. He feels that way winter and summer. Nursing mammas take a CASCARET at bedtime, and it makes their mother's milk mildly purgative and keeps the baby just right. Older children like to take the fragrant, sweet little candy tablet, and are safe from colic, gripes, diarrhoea, summer rash, prickly heat and all the mean troubles that summer brings with it.

Best for the Bowels. All druggists, 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped C. C. C. Guarranteed to cure or your money back. Sample and booklet free. Address.

Sterling Remedy Co., Chicago or New York.
